The RIM (receiving, inspection, and maintenance) facility at Launch Area F, Verkhnyaya Salda ICBM Complex, has been identified on photography of March 1964. It consists of a missile checkout facility, both under construction (Figure 1).

Construction of the missile checkout facility, which measures 170 ft, is approximately half complete. The two end walls and one side wall can be discerned. The end walls have a square configuration. Six rows of precast concrete arches are observed adjacent to the building.
